

## TABLE OF CONTENTS

List of Tables	viii
List of Figures	ix
Abstract	xi
1 INTRODUCTION	
1.1 Historical Introduction	1
1.2 Introduction to Digital Image Processing	3
1.3 Motivations and Organization	4
2 OPTICAL FIBERS AND IMAGING	
2.1 Introduction to Optical Fiber Guides	6
2.1.1 Ray theory	7
2.1.2 Optical fiber types	11
2.2 Fiber Optic Imaging	15
2.2.1 Manufacturing of fiber bundles	16
2.2.2 Imaging and resolution	17
2.2.3 Cladding effects	18
2.2.4 Transmission characteristics	19
3 EXPERIMENTAL SET-UP	
3.1 Introduction	20
3.2 Components of the Imaging System	20
3.2.1 Hardware elements	21
3.2.2 Software elements	25
3.2.3 Experimental set-up, alignment and image acquisition	25

4	IMAGE ENHANCEMENT TECHNIQUES	
4.1	Introduction	29
4.2	Scalar and Vector Images	30
4.3	The Image Histogram	31
4.4	Contrast Modification in an Image	32
4.4.1	Contrast enhancement techniques	34
4.4.1.A	linear contrast enhancement	34
4.4.1.b	saturating linear contrast enhancement	38
4.4.1.c	automatic contrast enhancement	40
4.4.1.d	logarithmic and exponential contrast enhancement	40
4.4.1.e	piecewise linear contrast enhancement	41
4.5	Template Operators	42
4.6	Image Domain Versus Fourier Transformation Approaches	43
4.7	Image Smoothing	44
4.7.1	Low pass filtering	44
4.7.1.a	mean value-smoothing	44
4.7.1.b	median filtering	47
4.7.2	High Pass Filtering	50
4.7.3	Adaptive Filtering	51
5.	RESULTS, APPLICATIONS AND CONCLUDING REMARKS	53

## APPENDICES

A	MATLAB Programs	
A.1	program for linear contrast enhancement	61
A.2	program to enhance contrast by adjusting background illumination	62

A.3	program for implementation of averaging, median and wiener filtering	63
A.4	program to count the no. Of particles imaged	65
A.5	program for edge detection	67
B	Theory of Geometric Optics	69
C	Procedure for Setting Up the Imaging System	72
